## RCSI HRS4R Action Plan - Implementation Tracker

1. Research freedom: Researchers should focus their research for the good of mankind and for expanding the frontiers of scientific knowledge, while enjoying the freedom of thought and expression, and the freedom to identify methods by which problems are solved, according to recognised ethical principles and practices desearchers should, however, recognise the limitations to this freedom that could arise as a result of particular research circumstances (including supervision/quidance/management) or operational constraints, e.g., for budgetary or infrastructural reasons or, especially in the industrial sector, for reasons of intellectual property protection Such limitations should not, however, contravene recognised ethical principles and practices, to which researchers have to adhere. STATUS: COMPLETE 13 Q4 Q1 Q2 Q3 Q4 Q1 Q2 Q3 Existing RCSI practices/policies and any gaps found Action(s) required Q2 Q3 The HRS4R Survey results 2014 (Q21, Q22) showed researchers generally satisfied with their research freedom. Issues where No gap at RCSI. Researchers at RCSI are afforded research freedom researchers felt research freedom was constrained by access to respectful of the mission & vision of the organisation 'To educate, nurture infrastructure or by substandard infrastructure are now addressed by and discover for the benefit of human health' while being 'recognised activities of new Laboratory Managers' Group and ongoing internationally as a leading centre for professional education, research refurbishment and building activities. The strategic appointment of a and innovation in healthcare [1]. Also, the Irish Universities Act 1997 [2] Research Institute Support & Development Manager (Dr Christopher which refers to Academic Freedom is a statutory instrument that Byrne) is instrumental in delivering a number of initiatives related to underpins RCSI. Backed up by HRS4R survey findings. access and space. 2. Ethical principles: Researchers should adhere to the recognised ethical practices and fundamental ethical principles appropriate to their discipline(s) as well as to ethical standards as documented in the different national, sectoral or institutional Codes of Ethics. STATUS: COMPLETE 13 Existing RCSI practices/policies and any gaps found Action(s) required Q4 Research Ethics procedures and information are now clearly No policy gap at RCSI. Policy on research ethics is published in the communicated via e-mail and on the website (the Ethics portal has RCSI Researcher Handbook been encompassed within the main RCSI website). Ethics training is now available to all research staff and courses are advertised on the NM/RS Draft & release policy statement on Research Integrity. ☑ staff Learning & Development portal. Add link to Research Integrity policy statement to RCSI NM/RS RCSI policy statement on Research Integrity needed Researcher Handbook.☑ · A Research Integrity Officer has been appointed and they are liaising Subscribe to IUA facilitated Policy Statement on Ensuring NOD with the national Research Integrity initiative to ensure RCSI is Research Integrity in Ireland (upon its release). informed and in line with best practice. While policies & procedures of RCSI Research Ethics Committee are on their website, the gap analysis revealed insufficient communication of Improve the visibility and communication of the essential Relevant documents have been developed and communicated to NC/DS ethics related information to researchers such as legal regulations & data documents and policies to researchers. researchers including: (1) Researcher Handbook (2) RCSI Statement protection on Research Integrity (3) RCSI Policy on Investigation into Allegations Develop a comprehensive training intervention for postgraduate HMV/ of Research Misconduct. RCSI have also subscribed to the IUA Policy NM/JS research students.☑ Statement on Ensuring Research Integrity in Ireland. An online tool for No formal training provided on Research Ethics and Integrity HMV/ Investigate expansion of above comprehensive training Research Integrity training is currently being considered at national intervention to wider research community. ☑ NM/JS 3. Professional responsibility: Researchers should make every effort to ensure that their research is relevant to society and does not duplicate research previously carried out elsewhere. They must avoid plagiarism of any kind and abide by the principle of intellectual property and joint data ownership in the case of research carried out in collaboration with a supervisor(s) and/or other researchers. The need to validate new observations by showing that experiments are reproducible should not be interpreted as plagiarism, provided that the data to be confirmed are explicitly quoted. Researchers should ensure, if any aspect of their work is delegated, that the person to whom it is delegated has the competence to carry it out. STATUS: COMPLETE 13 2016 Existing RCSI practices/policies and any gaps found Owner Action(s) required 04 01 No gap at RCSI. Research integrity is included in the RCSI Researcher Handbook. ✓ 4. Professional attitude: Researchers should be familiar with the strategic goals governing their research environment and funding mechanisms, and should seek all necessary approvals before starting their research or accessing the resources provided. They should inform their employers, funders or supervisor when their research project is delayed, redefined or completed, or give notice if it is to be terminated earlier or suspended for whatever reason. STATUS: COMPLETE

## Theme 2: Recruitment

12. Recruitment: Employers and/or funders should ensure that the entry and admission standards for researchers, particularly at the beginning at their careers, are clearly specified and should also facilitate access for disadvantaged groups or for researchers returning to a research career, including teachers (of any level) returning to a research career. Employers and/or funders of researchers should adhere to the principles set out in the Code of Conduct for the Recruitment of Researchers when appointing or recruiting researchers.

In 2017, we have begun to more actively track the composition of  |
| composition of selection committees.  |  |    |  |   |   |   |   |  |   |   |  |  | selection committees to ensure they are fair and representative. Again this is part of the wider RCSI Athena SWAN initiative.   |

28. Career development: Employers and/or funders of researchers should draw up, preferably within the framework of their human resources management, a specific career development strategy for researchers at all stages of their career, regardless of their contractual situation, including for researchers on fixed-term contracts. It should include the availability of mentors involved in providing support and guidance for the personal and professional development of researchers, thus motivating them and contributing to reducing any insecurity in their professional future. All researchers should be made familiar with such provisions and arrangements.

29. Value of mobility: Employers and/or funders must recognize the value of geographical, intersectorial, intersectorial, inter- and trans-disciplinary and virtual mobility as well as mobility between the public and private sector as an important means of enhancing scientific knowledge and professional development at any stage of a researcher's career. Consequently, they should build such options into the specific career development strategy and fully value and acknowledge any mobility experience within their career progression/appraisal system. This also requires that the necessary administrative instruments be put in place to allow the portability of both grants and social security provisions, in accordance with national legislation.

As part of the introduction of this policy we have engaged the services of an external Ombudsman to whom protected disclosures can be made in addition to internal College channels. A communications campaign to raise awareness of this has run on an annual basis since the introduction of the policy.  • A Scholarly Communications & Research Support Officer and an Associate Librarian for Education, Research & Clinical Support have been appointed and they can offer advice on best practice in relation to publishing.    |

34. Complaints! appeals: Employers and/or funders of researchers should establish, in compliance with national rules and regulations, appropriate procedures, possibly in the form of an impartial (ombudsman-type) person to deal with complaints/appeals of researchers, including those concerning conflicts between supervisor(s) and early-stage researchers. Such procedures should provide all research staff with confidential & informal assistance in resolving work-related conflicts, disputes & grievances, with the aim of promoting fair & equitable treatment within the institution & improving the overall quality of the working environment.

36. Relation with supervisors: Researchers in their training phase should establish a structured and regular relationship with their supervisor(s) and faculty/departmental representative(s) so as to take full advantage of their relationship with them. This includes keeping records of all work progress and research findings, obtaining feedback by means of reports and seminars, applying such feedback and working in accordance with agreed schedules, milestones, deliverables and/or research outputs.

37. Supervision and managerial duties: Senior researchers should devote particular attention to their multi-faceted role as supervisors, mentors, career advisors, leaders, project coordinators, managers or science communicators. They should perform these tasks to the highest professional standards. With regard to their role as supervisors or mentors of researchers, senior researchers should build up a constructive & positive relationship with the early-stage researchers, in order to set the conditions for efficient transfer of knowledge & for the further successful development of the researchers' careers. STATUS: COMPLETE Existing RCSI practices/policies and any gaps found Action(s) required Owner Q4 Q1 Q2 Q3 Q4 Q1 Q2 Q3 Q1 Q2 Q3 Q1 Q2 Q3 No gap in policy. 39. Access to research training and continuous development: Employers and/or funders should ensure that all researchers at any stage of their career, regardless of their contractual situation, are given the opportunity for professional development and for improving their employability through access to measures for the continuing development of skills and competencies. Such measures should be regularly assessed for their accessibility, take up and effectiveness in improving competencies, skills and employability.

40. Supervision: Employers and/or funders should ensure that a person is clearly identified to whom early-stage researchers can refer for the performance of their professional duties, and should inform the researchers accordingly. Such arrangements should clearly define that the proposed supervisors are sufficiently expert in supervising research, have the time, knowledge, experience, expertise and commitment to be able to offer the research trainee appropriate support and provide for the necessary progress and review procedures, as well as the necessary feedback mechanisms.
